## PUNJABI UNIVERSITY, PATIALA

### Policy on Plagiarism

#### Context

Punjabi University, Patiala aims to foster and maintain an ethos of honesty and academic integrity. All staff and students have an obligation to act in an ethical manner, consistent with the requirements of academic integrity. Punjabi University, Patiala has a well defined policy on plagiarism in place in order to avoid acts of academic dishonesty.

Plagiarism is a serious academic offence that may be easy to commit unintentionally, it is defined by the act not the intention. It is the responsibility of all students to familiarize themselves with the University's policy on plagiarism. The students are advised to seek guidance from their teachers/ staff member.

#### Purpose

The aim of the policy document is to provide a definition of plagiarism and the procedures adopted by the University for detection of plagiarism.

#### Scope

This policy applies to the final draft copy of the Ph. D Thesis Intended to be submitted to the University for Evaluation by research scholars registered with Punjabi University, Patiala.

*The University will follow the UGC (Promotion of Academic Integrity and Prevention of Plagiarism in Higher Educational Institutions) Regulations, as notified by UGC from time to time.*

### DEFINITION OF PLAGIARISM

Plagiarism is defined as the passing off of one's own work or another person's work as if it were one's own, by claiming credit for something that was actually done by someone else.

Plagiarism is an act of fraud committed knowingly or unknowingly by stealing someone else's work, idea (both scientific and literary work) and/or published materials. The act of plagiarism can be manifested in the form of publishing someone else's work, audio and video broadcasting, or circulation of copied words and images, ideas and opinions, discoveries, artwork and music, recordings or computer generated work (like circuitry, software or computer programs, websites-internet content).

Plagiarism takes many forms. Some common types of plagiarism include:

- Copying and Pasting (copying and pasting portions of text from online journal articles or websites without proper citation)
- Downloading or buying research papers (Down loading a free paper from a web site or paying to download a paper and submitting it as your own work).
- Copying or submitting someone else's written or creative work (in the form of words, images, ideas, opinions, graphics, formula, discoveries, invention, artwork, design, music, recordings, choreography, photographs, software, computer programs).
- Submitting a work/document that had been submitted previously by same one.
- Submitting a work that had been prepared by falsification/fabrication of data.
- Submitting a collaborative work without obtaining Proper consent from the concerned collaborator.
- Submitting a cross language content translation and use without reference to original work.
- Using work of a third party (for a fee/free) and represented by a student as his or her own work (Ghost writing).
- Indulging in acts of collusion and purloining–
  - Collusion-Different students submit work that is so alike in content that similarity goes beyond coincidence. This is contrary to the declaration given by the student that the given work is their own and has not previously been submitted for assessment for award of any Degree.
  - Under purloining form of plagiarism, a student takes information/text/data without the consent or knowledge of another student and submits it as his or her own.
- There are instances that the sources are cited but it is still considered plagiarized. For example:
  - The writer mentions an author's name for a source, but neglects to include specific information on the location of the material referenced (*forgotten footnote*).
  - The writer provides inaccurate information regarding the sources, making it impossible to find them.
  - The writer properly cites a source, but neglects to put in quotation marks, text that has been copied word-for-word, or closes to it.
  - The writer properly cites all sources, paraphrasing and using quotations appropriately. The catch? The document contains almost no original work!

Accordingly, plagiarism is not only limited to copying someone else's work completely, or in part, but also tweaking of a portion or portions from several sources so as to make it read as original work. In some instances, copying from one's own work can be an act of plagiarism, if the published material is copyright protected and was previously transferred to a publication house.

## HOW TO DETECT PLAGIARISM?

It is the prime responsibility of faculty members and students to distinguish between original content and plagiarized work. The detection of plagiarism is a judgment to be made by a person who understands the subject and who is also aware of the definition of plagiarism.

Common methods of detection of plagiarism are

- i. A portion of work or whole of it is found belonging to another author and a formal complaint is received about it.
- ii. A sudden change is found in the style of writing of a text inconsistent with the style used in the entire text-reported by examiner/ evaluator.
- iii. Under Software based detection a soft copy of the work is uploaded in plagiarism detection software. The common material content is found in submitted work and the original work in the database.

The present document chiefly focus on the procedure adopted by the Punjabi University, Patiala for Plagiarism detection using software.

### General Guidelines

*These guidelines are provided to assist the student and the faculty in ensuring a plagiarism free dissertation.*

### Important:

It is the responsibility of the student to ensure that the Ph. D Thesis being submitted for Evaluation is free of plagiarism which means that no part of the dissertation has been copied from other sources and all sources used for the dissertation have been properly cited.

### Requirement:

All students are required to check their Final draft copy of Theses intended to be submitted for evaluation through plagiarism detection software. The Supervisors are required to sit with their students and run the Thesis through plagiarism detection software in order to provide guidance on any revisions that may be required as a result of this process.

### Compliance Statements:

All students are required to submit a signed statement that they are aware of the plagiarism policy of the University and no part of the Ph. D Thesis being submitted for evaluation has been copied in any form and it is their own creation.

Candidate shall submit the report generated on the plagiarism checking software of his draft Thesis being submitted for evaluation along with a soft copy of the draft Thesis for the consideration of Departmental Research Board/Committee.

Supervisors must sign the relevant forms indicating that the student has indeed run their work through a plagiarism detection software.

### **Software Settings**

While performing the plagiarism check using a software the following optional settings may invariably be set to reduce the percentage of matching.

- Exclude Quotations, methodology, legal quotes, bibliography, phrases.
- Exclude Small Matches up to 10 word counts. (This is to exclude the matching of common phrases and established facts related to the topic which may come across the documents)
- Exclude Small similarity less than 1%.
- Exclude Mathematical, statistical and scientific Formula
- Exclude the title of the paper, name of the institute, Department, author name etc. from screening to reduce the percentage of matching.
- Exclude one's own published work

### **Practical Orientation**

Practical orientation on the use of the software will be provided by the Computer Centre of the University. The interested staff/students may contact Director, Computer Centre for Plagiarism Detection Service.

### **Materials to be screened**

It is mandatory to screen the final draft of Ph. D Thesis intended to be submitted for evaluation using plagiarism detection software.

### **Originality Report Guidelines-**

The report generated by the software upon submission of a Thesis for screening, only displays what percentage of submitted text is similar to or matching with the information sources included in the database. This is done through the Similarity Index, which is a percentage of words in the paper that match all the primary sources to all words in the document.

- As a general rule, a submitted text having an overall similarity index of more than the prescribed limit will be considered to be plagiarized.

*(As per UGC ( Promotion of Academic Integrity and Prevention of Plagiarism in Higher Education Institutions) Regulations 2018, letter no F1-18/2010 (CPP-II), dated 06<sup>th</sup> August 2018, a similarity index of 10% only would be permissible).*

- The overall similarity index excluding bibliography/references must be around permissible limit or less with not more than 5% similarity from within one particular source.
- A high matching percentage does not automatically mean that plagiarism has occurred and a low percentage does not mean that it has not occurred. In other words, the software generated report cannot be taken for granted and human judgment is needed to determine whether the matching text is plagiarized. This can be done only by cross checking the individual matching portions of the submitted Thesis with the corresponding sources by the committee consisting of Dean faculty, Head of the Department, Supervisor and a Professor from faculty to be nominated by Dean Research.
- A Thesis with an overall similarity index of more than permissible limit may also be accepted provided it is formed by cumulating more number of unintentional individual matches constituted of common phrases and professional jargons/terminology of not more than two lines of continuous text.
- Similarly, a submission with an overall similarity index of less than permissible limit may also be considered as plagiarized and hence liable to be rejected if there are instances of continuous blocks of matching text of two or more lines not constituted of common phrases and professional jargons/terminology.
- Also, if matching with a particular source, even though small, occurs across the length of a submitted Thesis it could be an attempt to hide plagiarism and hence will not be allowed.

## **GUIDELINES AND EXPLANATIONS**

### **Examples of Fabrication:**

- In the social sciences, a researcher/interviewer completing a questionnaire for a fictitious subject that was never interviewed.
- In the biological sciences, the creation of a data set for an experiment that was never actually conducted. The practice of adding fictitious data to a real data set collected during an actual experiment for the purpose of providing additional statistical validity.
- In clinical research the insertion of a clinical note into the research record to indicate compliance with an element of the protocol.

### **Examples of Falsification**

- Falsification is manipulating research materials, equipment, or processes, or changing or omitting/suppressing data or results such that the research is not accurately represented in the research record.

- Examples of Falsification :Alteration of data, falsification of dates and experimental procedures, misrepresenting the results from statistical analysis, The addition of false or misleading statements, misrepresenting the methods of an experiment and falsification of research accomplishments by publishing the same research results in multiple papers (self plagiarism)

**Guidelines on Do's:**

- Only one's original work to be submitted,
- Precise and accurate citation of others' work,
- Any downloaded information from internet to be appropriately created/referenced,
- Submitted material should not contain any artwork, pictures, and graphics from someone else's work and such materials should be authentic with no use of others' electronic storage media.

**Guidelines on Don'ts:**

The following must be avoided unless source of material/information is credited appropriately:

- Direct or indirect copying,
- Any act of translation without proper accreditation,
- Paraphrasing others' work,
- Tweaking and piecing together work of others,
- Resubmission of one's own or someone else's work,
- Claim of a collaborative work without consent from the concerned collaborator(s) (includes unauthorized collaboration and claiming a collaborative work as an independent one or vice versa),
- Ghostwriting–i.e. writing a document(s) on someone's behalf.
