Daniel K.N. Johnson is Chair of the Economics and Business Department, Colorado College, and a tenured Associate Professor of Economics there.

Provides a fresh perspective to the ongoing debate on the core themes of development economics

This book, in honour of **Robert E. Evenson**, brings together diverse, yet interrelated, areas of innovations such as agricultural development, technology and industry while assessing their combined roles in developing an economy. Thematically structured, it covers innovation and economic development; technological progress and agricultural development; and technology transfer, national innovation systems and industrial development.

With essays addressing the significant aspects in development economics, it offers a unique contribution in terms of focusing on problems from the perspective of developing economies.
