- Instructions for giving responses**
1. The candidate must fill the roll number in words and figures at specified places. In this sample sheet the roll number is filled as 12407. Under every digit of the roll number, the corresponding circle should also be shaded. For this purpose ten circles marked as 1,2,3,.....9 and 0 have been provided under every digit.
 2. In the response sheet, each question has five circles which have been designated as A,B,C,D and X out of which one and one circle should be shaded.
 3. Each question will consist of four alternative choices marked as A,B,C and D. Out of these only one will be correct. For every question which the candidate wants to attempt, corresponding circle out of A,B,C or D should be shaded on the response sheet. Out of these, all correct responses shall be awarded 4 marks each, while the wrong ones shall result in the deduction of 1 mark each.
 4. **For the questions, which are to be left unattempted, the circle corresponding to X should be shaded to avoid negative marking.**
 5. In the given specimen, for question 1 the response shall be taken as A, while that for question 2 as B. In question 3, circle marked X has been shaded so it will be treated as an unattempted question and shall score no marks. In questions 4 and 5 more than one circle have been shaded and shall result in the deduction of 1 mark each. The remaining questions that are left blank shall also be awarded negative marks of 1 each.
 6. Use only **black ink sketch pen** for shading the circles in such a way that no white space is left. Partially shaded circles may not be resolved properly, which may result in negative marking. Use of a Pencil or a Ball point pen for shading the circles is not allowed.
 7. Writing anything on the response sheet except at the specified places may lead to cancellation of result.
 8. Use of rubber, blade or a fluid to alter the responses is strictly prohibited. This will result in negative marking.
