Subject: Artificially Intelligent Mock-AI - A complete interview improvement guide for your students

Mock-AI, India's first ever AI based interview platform, will answer all these questions. It provides a comprehensive feedback of do's and don'ts.

What to improve? How to improve? Whether to make eye-contact with the interviewer? Whether to move hands or not? ... Mock-AI will teach them all.

The 6-pager detailed report is a comprehensive guide to impress when the student meets the interviewer next! The report offers:

Scores on three different parameters	Suggestions to improve body language	Suggestions to improve speaking style
Video snapshots to see where they were good and where to improve	Interview Do's and Don'ts	A detailed personalized list of resources to improve

Don't send your students blind-folded to an interview. Help them get a real-life interview experience and stand-out from the crowd.
Get Mock-AI for your students, today!
